

If I have gone due to accidents such as coronavirus

This email service (199903.xyz and tls-mail.com) is the one-man shop. If I (Jeffpan on emaildiscussions.com) have gone, I will switch all privileges (login and admin) to a reliable people who come from EMD too.

The management systems include:

Domain registrars:

199903.xyz - registered from *Name.com*, it will expire on 2030-02-08, very long time from now (2020-11-25).

tls-mail.com - registered from *Cloudflare*, it should renew by every year, the next expired date is 2021-09-24.

I will transfer all my login and admin credentials to you, you should update the domain's contacts to new data of yourself, and renew the domains.

Email hosting:

The system is powered by *MXRoute*, which is run by Jarland on EMD and Lowendtalk.

It will be renewed by every year. The next renewal date is 2021-12-05.

I will provide the admin panel's login credentials to you.

Since this is a BF offer, it's not expensive. You should renew this reseller plan on MXRoute.

Web hosting:

The official homepage and SquirrelMail webmail are run on *Virmach*'s VPS.

It will be renewed by every year. The next renewal date is 2021-11-29.

I will provide the VM's login credentials, and admin panel's login credentials to you.

Since this is a BF offer, it's not expensive. You should renew the VPS plan on Virmach.

CDN & DNS:

The site uses *Cloudflare* for CDN and HTTPS access. It's the free version.

I will provide the admin panel's login credentials. Nothing special to do.

I hope everyone is healthy during the coronavirus. Thanks.

Jeffpan
